SUMMARY

Highly skilled Backend Developer with 1+ year of experience building scalable web applications using Laravel, PHP, and MySQL. Proficient in developing scalable web applications and maintaining robust codebases. Experienced in integrating front-end technologies like Angular, HTML, CSS, and JavaScript. Adept at working with version control systems such as GitHub. Seeking to leverage skills and experience in a challenging Laravel Developer role.

WORK EXPERIENCE

Seyfert Infotech | Pondicherry | December 2023 – Present
Backend Developer

- Developed and maintained web applications using Laravel framework, improving application performance and scalability.
- Designed and implemented RESTful APIs for seamless integration with front-end applications.
- Utilized MySQL for database management, including schema design, optimization, and query tuning.
- Collaborated with front-end developers to integrate Angular components with backend services.
- Managed code versioning and collaboration through Git and GitHub, ensuring code quality and consistency.
- Contributed to Shopify projects, customizing themes and developing apps to enhance e-commerce functionality.

Askan Technologies | Pondicherry | March 2023 – December 2023
Intern – Full Stack Developer

- Assisted in developing and maintaining web applications using the Laravel framework
- Gained experience in PHP coding, MySQL database management, and integrating front-end technologies.
- Supported the team in implementing features, debugging code, and optimizing performance.
